

This Master Plan illustrates Sam Houston State University's long term goal to relocate the Department of Agricultural and Industrial Sciences to Gibbs Ranch.

The initial phases will see the construction of a new world-class Arena Complex that will serve the University's need for enhanced educational opportunities, provide a facility with high revenue-generating potential, and serve as a fitting home for the University's championship rodeo team.

As envisioned, the Arena Complex will include

- Main Arena with seating for 2,500
- Warm-up Arena
- Covered Connector Building
- Entry, Ticketing & Vendor Areas
- Covered Stall Barn
- R/V Parking Area
- Car Parking for 1,500 cars (750 in Phase I)

Proposed Gibbs Ranch
